

Region III FRN 2014 CQI Survey Results

Purpose of the Survey:

In a response to Results Based Accountability and to foster a culture of Continuous Quality Improvement (CQI), the Department of Health and Human Resources, Bureau for Children and Families, Division of Children and Adult Services began conversations with Family Resource Networks (FRNs) in late 2011. In an effort to assist and meet the desires of the FRNs to be accountable with data rather than anecdotal stories, the Bureau adapted the community collaboration portion of the 2012 Peer Review¹ in CBCAP process that Family Resource Centers currently undergo. For more information on the CQI process, please visit <http://friendsnrc.org/continuous-quality-improvement>.

Because the FRNs are provided with planning and coordination grants from the WVDHHR, community collaboration should be a key cornerstone of every FRN. This can be universally measured across all FRNs regardless of the way they function or the diversity of outcomes they are working toward. During FY'12, DHHR program staff met with the FRNs to review the instrument, take comments, and revise the instrument for distribution. WVDHHR developed a process where FRNs submitted their list of community networks. The survey was distributed electronically or by paper to a list of community stakeholders the FRN provided. Using SurveyNet software, responses were recorded electronically or entered when the paper survey was returned to the WVDHHR. The following is a report based on the responses received from the community network of the Region III FRNs for fiscal year 2014.

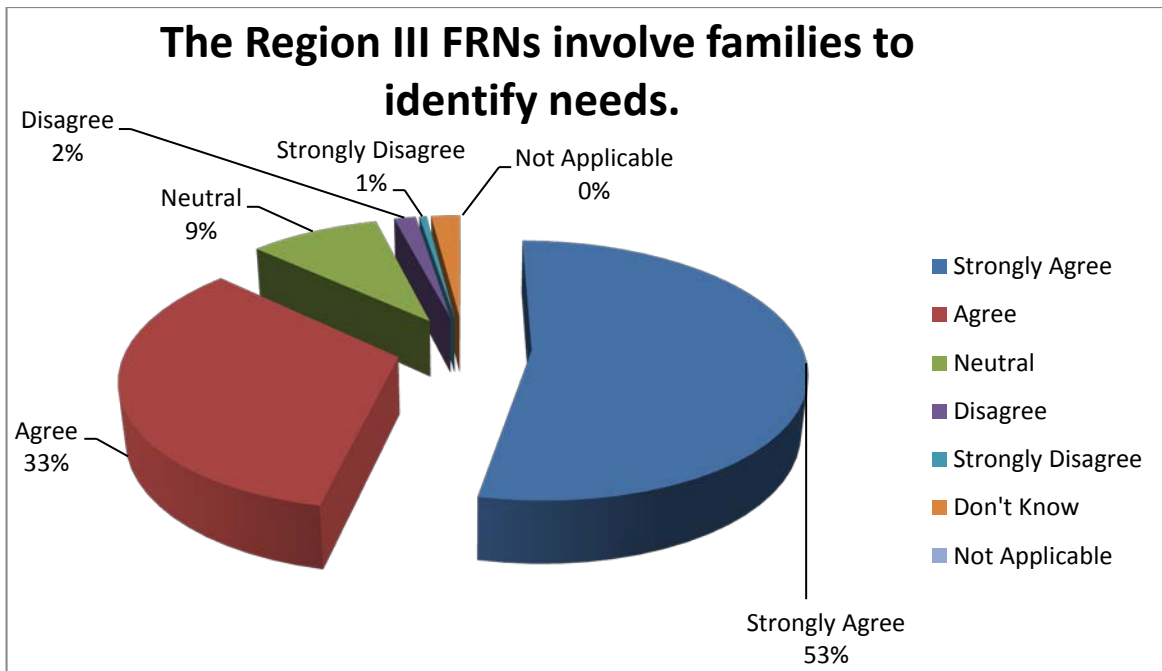

The Region III FRNs had 197 surveys completed. Below are the questions and responses from the survey.

Recommendations:

FRNs were asked to consider their family involvement. §49-6C-2 requires the FRN to have non-providers, which include family representatives and other members who are not employees of publicly funded agencies, as the majority of the members of the governing body, and having family representatives as the majority of the non-providers. FRNs were asked to be creative in making sure the family voice is represented in the assessment of the FRN.

FRNs are asked to review the results of their individual reports with their executive board as well as their larger network and community. Transparency and feedback will only improve participation in the survey in the future. To avoid data fatigue, FRNs were asked to review only one or two questions at a time. Do the results correspond with their expectations? As they consider these results, we want them to think about ways you want to use them. Are there one or two areas the FRN can improve upon or celebrate success? CQI is about the celebration as well as improvement!
