## West Virginia Vaccine-Preventable Disease Tables\*

Single dose MMR vaccine requirement for K-12 entry in effect prior to 1988

1992/1993 school year WV required 2<sup>nd</sup> dose for K-12 entry

2008/2009 school year – all pre-K immunization requirements went into effect including 2 doses of MMR

<b>Invasive <i>Haemophilus influenzae</i> serotype B†</b>				
Year	Number of Reported Cases of HiB	Cases with untypable Serotype	Cases Not Tested for Serotype	Cases with Missing Serotype Information
2008	2	7	5	0
2009	4	7	3	0
2010	5	9	8	2
2011	2	7	8	1
2012	6	7	2	6
2013	3	12	5	1
2014	6	14	2	1
2015	0	24	9	7

2008/2009 school year WV required HiB vaccine for pre-K entry

†for those invasive *haemophilus influenzae* cases where the isolate was not tested/not typable/or information is missing, we cannot rule out serotype B

<b>Varicella</b>	
Year	Number of Reported Cases
2008	700
2009	493
2010	458
2011	454
2012	283
2013	232
2014	161
2015	160

2008/2009 school year WV required 2 doses of varicella vaccine prior to K-12 entry, with 1 dose required for pre-K entry

\* This data reflects total case counts, by year, for all age groups

## West Virginia Vaccine-Preventable Disease Tables\*

<b>Invasive Pneumococcal Disease</b>	
<b>Year</b>	<b>Number of Reported Cases</b>
2008	330
2009	327
2010	372
2011	375
2012	322
2013	329
2014	246
2015	229

2008/2009 school year WV required PCV for pre-K entry
