

**West Virginia Provisional Weekly Infectious Disease Surveillance Report\***  
**Week Ending January 2, 2016**

Reportable Condition	Current	2015	2014	2014
	Report Week	YTD Total	Comparable YTD Period	Total for Year
Beginning Date	12/27/2015	1/4/2015	12/29/2013	12/29/2013
Ending Date	1/2/2016	1/2/2016	1/3/2015	1/3/2015
Anaplasmosis			3	3
Anthrax				
Babesiosis				
Botulism, infant		1		
Brucellosis			3	3
Campylobacteriosis	2	312	270	270
Chikungunya virus			3	3
Cholera				
Cryptosporidiosis		20	10	10
Cyclosporiasis				
Dengue fever		2	1	1
Diphtheria				
Ehrlichiosis, chaffeensis		6	4	4
Ehrlichiosis/Anaplasmosis, undetermined		1		
Giardiasis	2	65	66	66
Hantavirus pulmonary syndrome				
<i>Hemophilus influenzae</i> , invasive		44	48	48
Hemolytic uremic syndrome, postdiarrheal		1		
Hepatitis A, acute		8	12	12
Hepatitis B, acute		242	186	186
Hepatitis B, chronic		283	316	316
Hepatitis B, perinatal		2		
Hepatitis C, acute		56	62	62
La Crosse encephalitis, neuroinvasive		3	1	1
La Crosse encephalitis, non-neuroinvasive		1	2	2
Legionellosis		34	49	49
Leptospirosis				
Listeriosis		9	9	9
Lyme disease		306	166	166
Malaria		2	2	2
Meningococcal disease, invasive		2	1	1
Mumps		2	2	2
Pertussis		73	18	18
Plague				
Poliomyelitis				
Q fever		1	3	3
Rubella				
Rubeola (Measles)				
<i>S. aureus</i> (GISA/VISA, GRSA/VRSA)				
Salmonellosis		194	180	180
SARS				
Shiga toxin-producing <i>Escherichia coli</i> (STEC)		41	33	33
Shigellosis		14	13	13
Smallpox				
Spotted Fever Rickettsiosis		9	7	7
Streptococcal disease, Group B, invasive	1	99	109	109
Streptococcal toxic shock syndrome		1		
<i>Streptococcus pneumoniae</i> , invasive		181	247	247
Tetanus				
Toxic-shock syndrome, staphylococcal			1	1
Trichinosis				
Tularemia			1	1
Typhoid fever				
VHF (Viral Hemorrhagic Fever)				
Vibriosis (non-cholera species)		2	3	3
Yellow fever

### **\*Additional Information:**

1. Cases are counted based on the date of report to the West Virginia Electronic Disease Surveillance System (WVEDSS).
2. Case counts are provisional and subject to change as new information becomes available.
3. This report includes cases that have been closed as confirmed, probable and suspect.
4. Case counts from Sunday to Saturday are compiled and reported the following week.
5. Not all WV reportable infectious disease conditions appear on this list.

For the complete list proscribed by WV Code 16-3-1; 64CSR7, [click here](#).

6. This summary underestimates the true burden of disease as not all case-patients are detected or reported.

Why use these date cut-offs?

These date ranges correspond to those used by the CDC to define surveillance weeks for the current year.

For 2015, the first surveillance week runs from Sunday, January 4 through Saturday, January 10.

Each subsequent surveillance week ends on the following Saturday.

By using these date ranges for this weekly summary of cases, we ensure that these numbers match what was reported to the CDC.
