

# Food for Thought Lunch and Learn

Sherif Ibrahim, MD, MPH, Regional Epidemiologist Liaison/Outbreak  
Epidemiologist, Division of Infectious Disease Epidemiology,  
3/31/2015

# Objectives

- Share data on case completeness and “lost to follow-up.”**
- Increase the success rate of locating patients for case investigations.**
- Explain why “Not Lost to Follow-up” is crucial in successful Ebola case investigation.**
- Share data on outbreak reporting in West Virginia 2009-2014.**

# Instructions

**While you are enjoying your lunch please:**

- **Review the handout.**
- **Write down your unique ideas/approaches to engaging your other partners (police, fire, EMT, hospital staff) in locating people.**
- **Write down how to overcome challenges on outbreak detection and reporting in West Virginia.**

# Instructions

**Ideas generated during lunch will be posted around the room for participants to browse and learn during afternoon break.**
